

# Sabah Forestry Department

## FLEGT UNIT DATABASE & WEBSITE

Sustainable Forest Management Division

### OBJECTIVES

- **The objectives of the FLEGT Database & Website are:**
  - To facilitate the Unit especially in handling data entry and reporting on the implementation of FLEGT activities in Sabah.
  - To have a proper data management on the results of the FLEGT projects implemented in Sabah, for quick reference and proper dissemination to the public.
  - To provide information on FLEGT i.e. FLEGT projects in Sabah (e.g. SFMLA Auditing project) and FLEGT-VPA implementation status and progress particularly in Sabah, and Malaysia in general, to the public.

# Description of the Project

- **The FLEGT Database & Website:**
  - A web based realtime application running in Internet network
  - Development is categorised into two division; Database and Website
  - Database using open source MYSQL software for data storage and retrieval
  - Website utilised Active Server Page (ASP) programming language
  - Website is categorised into Public Site (for public information) and Administrative Site (for web data management)

# What are the outputs?

- **The FLEGT Database & Website consist of:**
  - License/Licensee Information
  - Audit findings
  - Audit Summary Results
  - Automated Scoring
  - GAP – continuously updated
  - Corrective Action Request (CAR)
  - List of Auditors
  - Gallery – Audit related information & pictures, etc.

## Who is responsible?

- Data entry will be managed by FLEGT Unit (admin).
- ICT division (admin) will assist in terms of maintaining the database and website.
- Will also be linked with EPD & NIOSH website
- Viewers are able to contact the administrators through the database & website should there be any comments or suggestions.
- Will continuously be monitored and updated
- Will be made available for public view.

## What are the benefits?

**Among the benefits gained are as follows:**

- Transparency
- Information sharing
- Able to monitor the performance rating of FMU
- References
- Effective information disclosure

# What is next?

## Among the future works are:

- To include 2 principles;
  - Principle 5: Mill Operation
  - Principle 6: Trade and customs
- To further improve and enhance the system following future demands and suggestions

Environment Protection Department

FLEGT(Forest Law Enforcement, Governance and Trade) system involves three parties which are Sabah Forestry Department(SFD), Environment Protection Department(EPD), and National Institute of Occupational Safety and Health(NIOSH). It is intended especially for the FLEGT unit in SFD to facilitate them in handling data entry and reporting on the implementation of FLEGT activities in Sabah.

The system will focus on monitoring the performance rating of the Forest Management Units(FMU) in Sabah based on the Timber Legality Assurance System(TLAS) checklist which is currently being used in Sabah independent Auditing of Sustainable Forest Management License Agreements (SFMLA) Project. In general, the system provide a proper data management on the result of the FLEGT projects implemented in Sabah, quick reference, proper dissemination to the public and provide information on FLEGT and FLEGT-VPA implementation status and progress particularly in Sabah, and Malaysia in general, to the public.
